DEPARTMENT HISTORY

1896-1907	State chartered banks supervised by Secretary of State.
1907	Office of Bank Examiner created.
1911	Office of Bank Commission established.
1913	Banking Department created.
1967	Bank Department renamed State Department f financial Institutions.
1969	Utah Uniform Consumer Credit code enacted.
1975	Utah Industrial Loan Guaranty Act.
1981	S.B. 134 Recodified Utah laws governing financial institutions. Effective July 1, 1981.
1983	S.B. 238 Depositors given priority over other creditors. New supervisory powers granted Commissioner permitting remedies short of possession. Effective March 18, 1983.
1984	S.B. 9 Authorized regional reciprocity and supervisory acquisitions within region without receiprocity. Also extended Department's authority over holding companies. Effective April 15, 1984.
1985	S.B. 262 Prohibited "nonbank banks". Also addressed administrative matters. Effective April 29, 1985. H.B. 245 Repealed Title 70B and enacted Title 70C revising Uniform Consumer Credit Code. Effective July 1, 1985.
1986	H.B. 189 "Banking Reform Act of 1986" required all industrial loan corporations to obtain federal deposit insurance, phased out existing regional reciprocity, opened state to nonreciprocal interstate banking after December 31, 1987 and immediately for failing institutions. Effective January 21, 1986.

REPORT OF COMMISSIONER

The Department of Financial Institutions faced unprecedented problems and changes during fiscal year 1986-1987. Fortunately, most of these problems appear to be abating and the Department is returning to normal operations.

Many problems have impacted Utah's financial institutions over the past several years. These problems were mostly national in scope. During the period covered by this report, the FSLIC was declared insolvent and required Congressional action to provide additional funding. Bank failure rates nationally continued to increase and should once again reach a record number in 1987, continuing a recent trend. These problems mostly originated with conditions in the economy that affected the bank and savings and loan industries as a whole. In Utah, at least, the economic problems affecting Utah's banks and savings and loans appear to have bottomed out and we now see a recovery beginning with a corresponding reduction in institutional failures.

Two banks and one savings and loan were closed in Utah during fiscal year 1986-1987. The Bank of Iron County in Parowan, Utah was taken over by the state and liquidated by the Federal Deposit Insurance Corporation on April 10, 1987. On April 24, 1987, Summit Savings and Loan Association was closed by the Federal Savings and Loan Insurance Corporation, which had been appointed Summit's conservator the prior year. Heritage Bank and Trust was taken over by the state and liquidated by the FDIC on April 29, 1987.

Seven thrift and loan companies failed in 1986 and 1987, resulting in the worst crisis involving financial institutions in Utah since the great depression. On July 31, 1986, the Commissioner took possession of the Industrial Loan Guaranty Corporation of Utah and restricted withdrawals from all deposit accounts in all thrift and loan companies which had not been able to obtain federal deposit insurance. Of the seven companies whose deposits were initially affected, only one has avoided closure and liquidation. Four of the companies, Charter Thrift and Loan, Copper State Thrift and Loan, Western Heritage Thrift and Loan and Interlake Thrift are currently being liquidated by Grant Thornton and Company, a national accounting firm. Estimating recoveries from these liquidations is difficult at this time but the probabilities are high that depositors will suffer losses. Another company, Commerce Financial, was closed and turned over to one of its former owners, Mr. Larry Miller, for liquidation subject to a minimum percentage return to each depositor personally guaranteed by Mr. Miller. In Cedar City, Horizon Thrift and Loan was closed and its assets conveyed to Utah State Credit Union in exchange for payment to Horizon's depositors in the form of federally-insured deposit accounts in the credit union equal to 85% of the deposit in the thrift. St. George Thrift and Loan was the last company whose deposits were subject to withdrawal restrictions. It recently succeeded in obtaining conditional approval for FDIC insurance and has made good progress on satisfying the FDIC's conditions. It is hoped that its deposit insurance will become effective in the near future.

An unfortunate additional casualty of the problems in the thrift and loan industry was Foothill Financial, which had to be closed in April, 1987, in the midst of a run by its depositors following news reports that conditions imposed for obtaining FDIC insurance had not been met and Foothill's accounts were not yet federally insured. Foothill had been approved for federal deposit insurance subject to meeting those conditions. All of Foothill's deposit liabilities and most of its assets were acquired by Zions First National Bank in a transaction completed before the opening of business on the next business day.

In May, 1987, the Department, working in conjunction with the State Insurance Department, the Governor's office and the Attorney General's office, was able to arrange for a conversion to federal insurance of all Utah credit unions whose accounts were insured by a private, industry-owned insurer. After this conversion was completed, federal deposit insurance protected every depositor in Utah.

Turning next to interstate expansion, two of Utah's largest state-chartered banks were acquired by out-of-state organizations during 1986 and 1987. Valley Bank and Trust Company was acquired by Valley National Corporation of Phoenix, Arizona, and Commercial Security Bank was acquired by KeyCorp, a bank holding company based in Albany, New York. Valley Bank of Utah is now operating as a subsidiary of Valley National. KeyCorp's acquisition of Commercial Security Bank will not become effective until December 31, 1987, due to restrictions currently affecting acquisitions of Utah banks by organizations based in a state which was not part of the reciprocal region authorized by the Utah Legislature in 1985. This region will be eliminated in favor of nationwide eligibility at year end.

Other interstate acquisitions were made by two Arizona savings and loan associations which are expected to begin opening Utah branches in the near future.

Finally, Delta Airlines Employees Credit Union, based in Atlanta, Georgia, was authorized to open a Utah branch to begin serving Delta's Utah employees.

The following summary table reflects the relative position of Utah depository institutions and the changes during the fiscal year 1986-1987.

TECHNICAL APPENDIX

Vital Statistics Registration in Utah

Centralized vital statistics registration for the State of Utah was first established by act of the Utah Legislature in 1905. Sections 26-2-1 through 26-2-26, Utah Code Annotated, 1953 As Amended, provide the current statutory authority.

> 26-2-3. The Department (of Health) shall have the following powers and duties:
>
> (1) Provide offices properly equipped for the preservation of vital records made or received under this chapter;
> (2) Establish a state-wide system of vital statistics for the registration, collection, preservation, amendment and certification of vital records and other reports required by this chapter and activities related thereto including the tabulation, analysis, and publication of vital statistics;
> (3) Prescribe forms for certificates, certification and other necessary forms;
> (4) Provide for the annual compilation, analysis, and publication of statistics from vital records;
> (5) Enforce this chapter and the rules made pursuant hereto;
> (6) Appoint a state registrar of vital statistics to direct the statewide system of vital statistics;
> (7) Divide the state from time to time into registration districts; and
> (8) Appoint local registrars for registration districts who, under the direction and supervision of the state registrar shall perform all duties required of them by this chapter and the rules of the department.

Under Utah statutes, full-time health officers of local health departments become ex officio local registrars and are responsible for the registration of certificates for all births and deaths that occur within their respective jurisdictions. Four of the 29 counties (Salt Lake, Tooele, Utah and Davis), and five multi-county districts--Southeastern (Carbon, Emery, Grand and San Juan Counties); Bear River (Box Elder, Cache and Rich Counties); Southwest (Beaver, Garfield, Iron, Kane and Washington Counties); Central Utah (Juab, Millard, Piute, Sanpete, Sevier and Wayne Counties); and Weber-Morgan (Weber and Morgan) maintain full-time local registrars. The local registrars within the remaining five counties are appointed by the State and usually perform their duties on a part-time basis, and in many cases simultaneously assume other positions within their community. The map of the State of Utah, Figure C-1, indicates the location of the local registrars within each of the 29

Source of Data

Vital statistics certificates filed with the State Bureau of Vital Records are the primary source of data presented within this report. These records include certificates of live birth, death and fetal death. Source data for population estimates are provided by the United States Bureau of the Census.

Certificate Revision

The Utah certificate of live birth has been revised periodically; the most recent revisions occurring in 1982. This certificate was recommended by the State Health Advisory Council and distributed to the local registrars for use in registering all such events occurring in 1986, Figure C-2. The new certificate includes all of the items on the recommended national "Standard Certificate," with some modifications and additions to meet particular needs in Utah.

Quality and Limitation of Data

Limitations of the data must be recognized before valid interpretation is possible. For vital statistics, these limitations are related to the difficulties in reporting and classifying information and to some under-registration of events. It is necessary to exercise particular caution when evaluating vital statistics' trend data, since medical concepts and code definitions have changed over the years.

The completeness of registration for births was last tested at the state level in conjunction with the U.S. Census of the population in 1950, and was found to be 98.7 percent complete at that time. At the present time, more than 99 percent of all Utah's births occur in hospitals. This fact, coupled with information from sample studies, indicates that the completeness of birth certificate registration now exceeds 99 percent.

Limitation of Small Numbers

All statistics are subject to chance variation. Such random variation in a large number of events has little effect on the data for the group; however, random variation in a small number of events may result in a startling change in the data for the group. For example, minor differences in the number of births in small populations may result in large changes in these rates. Rates for areas of small population or for events with few occurrences should be interpreted with this limitation in mind.

Geographic Bases

Birth data are presented by place of occurrence of the event or by place of usual residence of the individual. "Place of residence" for the child is defined as the usual residence of the mother.

Reallocation of birth certificates to the state of residence has been virtually complete on a nationwide basis since 1955. This is made possible by a cooperative program among the states for exchange of copies of certificates of non-resident events which are for statistical purposes only.

TECHNICAL REPORT NO. 92

PREFACE

This report contains data on deaths experienced by Utah's residents in 1986. The source of these data is approximately 8,900 death certificates registered during the year in the Bureau of Vital Records, Utah Department of Health.

The purpose of this report is to provide basic mortality data for planners, students, researchers, public officials, private business and the general public. Data are presented for the State of Utah, the local health districts, and each of their counties. The Bureau has prepared another report in the same general format on resident births.

This year's report is a departure from the traditional format of reporting Utah's vital statistics, i.e., births, deaths and fetal deaths in one report. In order to expedite distribution of these data and to make the report current, we have prepared separate technical reports of births and deaths, and eliminated the narrative.

Additional mortality tabulations for Utah in 1986 are available upon request. These tables will be provided by the Center for Health Information. The last section of the report is the Technical Appendix with information on the sources, quality and limitations of data.

If you have any comments or suggestions about the content and/or format of the report or any of the tables, we want to hear from you. Please send your comments to Marvin I. Levy, Policy Analyst, at the address on the title page.

This publication was prepared under the direction of Gar T. Elison, Director, Bureau of Planning and Policy Analysis. Lloyd Ryujin, coordinated production of the report. Gery E. Moore, Statistician, wrote the computer software and ran the statistical tabulations. Nola Hanson, Secretary, typed the tables for printing and did final editing.

This report was partially supported by contract number 282-85-2003 awarded by the U.S. Department of Health and Human Services in support of the Vital Statistics Cooperative Program of the National Center for Health Statistics.

NOTES: TOTAL EXPECTED YEARS OF LIFE LOST IN THIS TABLE SHOULD NOT BE COMPARED TO TOTAL EXPECTED YEARS OF LIFE LOST PRIOR TO 1984. THE UNDERLYING EXPECTED YEARS HAVE CHANGED BY USING THE LIFE TABLE, ABOVE. PERCENTAGES ARE STILL COMPARABLE.
WORKING YEARS ARE DEFINED AS AGES 15 TO 65. WORKING YEARS OF LIFE LOST ARE COMPUTED FROM THE NUMBER OF YEARS BETWEEN AGE AT TIME OF DEATH AND AGE 65 WITH NO ACCOUNTING FOR YEARS BEFORE AGE 15. FOR EXAMPLE, IF A PERSON DIES AT AGE 5, WORKING YEARS OF LIFE LOST WOULD BE 50.

TECHNICAL APPENDIX

Vital Statistics Registration in Utah

Centralized vital statistics registration for the State of Utah was first established by act of the Utah Legislature in 1905. Sections 26-2-1 through 26-2-26, Utah Code Annotated, 1953 As Amended, provide the current statutory authority.

> 26-2-3. The Department (of Health) shall have the following powers and duties:
>
> (1) Provide offices properly equipped for the preservation of vital records made or received under this chapter;
> (2) Establish a state-wide system of vital statistics for the registration, collection, preservation, amendment and certification of vital records and other reports required by this chapter and activities related thereto including the tabulation, analysis, and publication of vital statistics;
> (3) Prescribe forms for certificates, certification and other necessary forms;
> (4) Provide for the annual compilation, analysis, and publication of statistics from vital records;
> (5) Enforce this chapter and the rules made pursuant hereto;
> (6) Appoint a state registrar of vital statistics to direct the statewide system of vital statistics;
> (7) Divide the state from time to time into registration districts; and
> (8) Appoint local registrars for registration districts who, under the direction and supervision of the state registrar shall perform all duties required of them by this chapter and the rules of the department.

Under Utah statutes, full-time health officers of local health departments become ex officio local registrars and are responsible for the registration of certificates for all births and deaths that occur within their respective jurisdictions. Four of the 29 counties (Salt Lake, Tooele, Utah and Davis), and five multi-county districts--Southeastern (Carbon, Emery, Grand and San Juan Counties); Bear River (Box Elder, Cache and Rich Counties); Southwest (Beaver, Garfield, Iron, Kane and Washington Counties); Central Utah (Juab, Millard, Piute, Sanpete, Sevier and Wayne Counties) and Weber-Morgan (Weber and Morgan) maintain full-time local registrars. The local registrars within the remaining five counties are appointed by the State and usually perform their duties on a part-time basis, and in many cases simultaneously assume other positions within their community. The map of the State of Utah, Figure C-1 indicates the location of the local registrars within each of the 29 counties. Presently, there are 16 local registrars and 14 deputy local registrars in the State.

Source of Data

Vital statistics certificates filed with the State Bureau of Vital Records are the primary source of data presented within this report. These records include certificates of live birth, death and fetal death. Source data for population estimates are provided by the United States Bureau of the Census.

Certificate Revision

The Utah certificates of death and fetal death have been revised periodically; the most recent revisions occurring in 1981 for deaths and 1984 for fetal deaths. In October, 1983, a minor addition was made to the death certificate. A space for the Medical Examiner case number was included in item 22. These certificates were recommended by the State Health Advisory Council and distributed to the local registrars for use in registering all such events occurring in 1986, Figures C-2 and C-3. The new certificates include all of the items on the recommended national "Standard Certificates," with some modifications and additions to meet particular needs in Utah.

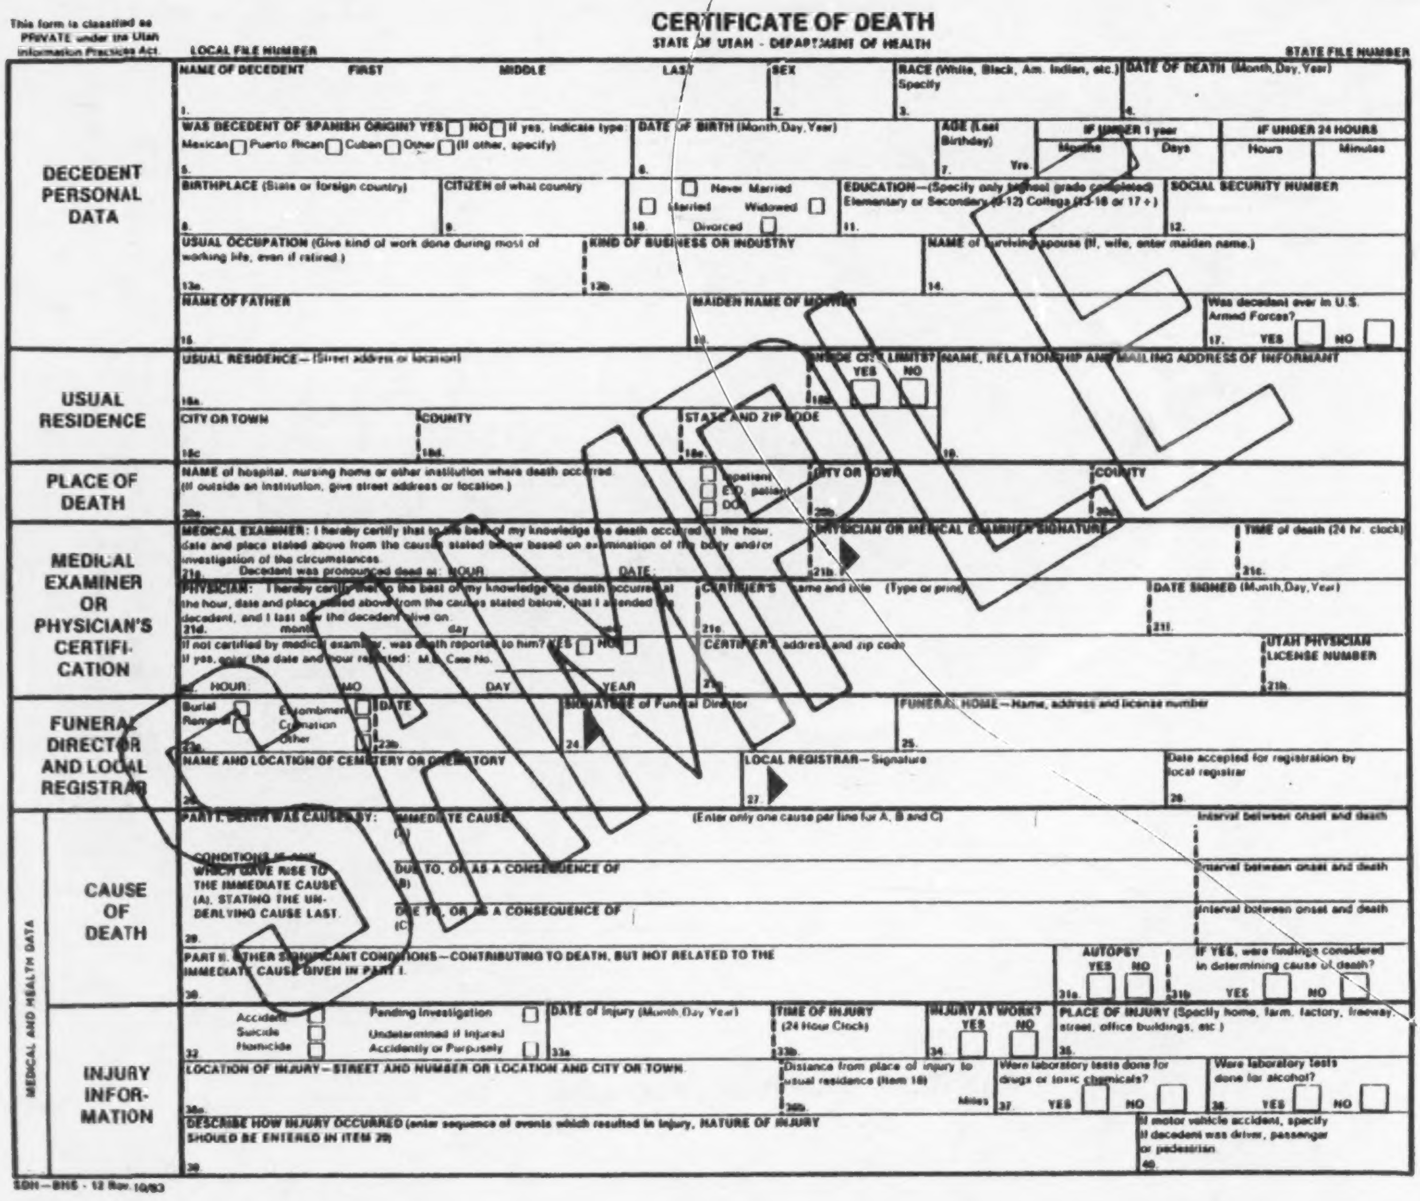
Quality and Limitation of Data

Limitations of the data must be recognized before valid interpretation is possible. For vital statistics, these limitations are related to the difficulties in reporting and classifying information, and to some under-registration of events. It is necessary to exercise particular caution when evaluating vital statistics' trend data, since medical concepts, code definitions and method of assigning causes of death have changed over the years.

The registration of fetal deaths of more than 20 weeks gestation is required by statute. Since May, 1981, the institution where the delivery occurs has had the responsibility for filing a fetal death certificate if the delivery results in a fetal death. Fetal death certificates are to be registered by the fifth day after the delivery and before disposition of the remains. Most deliveries (99%) occur in hospitals and women who miscarry unexpectedly at 20 weeks or more are usually taken to a hospital if they are not already there. Funeral directors are responsible for checking that a fetal death certificate has been filed for all such dispositions they handle.

Limitation of Small Numbers

All statistics are subject to chance variation. Such random variation in a large number of events has little effect on the data for the group; however, random variation in a small number of events may result in a startling change



This form is classified as PRIVATE under the Utah Information Practices Act.

in the data for the group. For example, minor differences in the number of deaths in small populations or in the number of deaths from uncommon causes may result in large changes in these rates. Rates for areas of small population or for events with few occurrences should be interpreted with this limitation in mind.

Cause of Death

Cause of death statistics are derived from the medical certification information required by law to be reported by the attending physician or medical examiner on the death or fetal death certificate. The medical certification item on certificates of death and fetal death has provision for reporting three causes of death--immediate, intervening, and underlying, plus additional information related to the cause of death. The cause of death selected for coding and tabulating mortality statistics is the "underlying cause of death," which is generally defined as the disease or injury which initiated the sequence of morbid events leading directly to death.

Occasionally, death certificates are registered with the cause of death information incomplete, inconsistent, or equivocal and additional information from the certifier is not available. In such causes, selection and modification rules are used to select the underlying cause of death for statistical purposes. Selection and modification rules which adapt the coding procedures to reporting practices in the United States are published by the Public Health Service, National Center for Health Statistics, in annual editions of the Vital Statistics Instructional Manual. From January 1, 1968 through December 31, 1978, the Eighth Revision International Classification of Diseases was used in classifying the underlying case of death on Utah's death certificates. Starting January 1, 1979, the Ninth Revision of the International Classification of Diseases has been used to code the underlying cause of death in Utah. Comparability ratios between revisions have been computed by the National Center for Health Statistics[1] and have been published in the Utah Vital Statistics, Annual Report: 1980. Comparability ratios for some cause of death codes show extreme variation and utmost caution should be taken in interpreting any cause of death trends that span the Eighth and Ninth Revisions of the International Classification of Disease.

Geographic Bases

Death data are presented by place of occurrence of the event or by place of usual residence of the individual. "Place of residence" is defined as the usual residence of the decedent.

Reallocation of death certificates to the state of residence has been virtually complete on a nationwide basis since 1955. This is made possible by a cooperative program among the states for exchange of copies of certificates of non-resident events which are for statistical purposes only.

It is considered to be meaningful for some purposes to tabulate accidental deaths by place of occurrence rather than by place of residence. Statistical tabulations of accidental deaths "by place of occurrence" refer to the place where the death occurred, and not the place where the accident occurred. A hypothetical example may help to clarify the above explanation. Assume that a resident of Denver, Colorado, is involved in a motor vehicle accident in Wendover, Nevada, and requires emergency aid of a special nature. The closest available facility is the Tooele Valley Hospital in Tooele, Utah. After arriving at the hospital, the patient succumbs to conditions arising from the accident. In such cases the "place of occurrence" of the death for statistical purposes would be Tooele, Utah, not Wendover, Nevada.
